

Mission:

*Restore ecosystems
and the sustainability of
communities, cultures
and economies.*

Goals:

-  Develop and implement proactive, community based ecological restoration projects
-  Provide vocational, on the job training and employment in ecological restoration
-  Educate students and the community about ecological restoration
-  Facilitate partnerships and build community capacity to accomplish landscape scale restoration

Lomakatsi Restoration Project

We are a non-profit organization that develops and implements forest and watershed restoration projects in Oregon and northern California.

Since 1995, we have helped restore ecological balance across thousands of acres of forests and miles of streams. Our work has set precedents on nationally recognized projects.

We provide expertise and capacity in program development, planning, management, fine-scale ecological treatment design, monitoring and restoration implementation.

Programs:

Restoration

Restoration Forestry:

Restoring complex forest ecosystems while reducing the threat of uncharacteristically severe wildfire.

Oak Habitat Restoration:

Protecting and promoting the development of habitat and plant communities for oak associated wildlife.

Prescribed Fire:

Reintroducing fire for restoration and long-term maintenance of ecosystems to promote diversity, health and resiliency.

Aquatic Habitat Restoration:

Restoring streams and riparian zones for fish and wildlife habitat.

Ecological Monitoring: Improving restoration treatments through effectiveness and implementation monitoring.

Education

Restoration Ecology Education:

Providing students, teachers and community members with hands-on restoration ecology education.

Community Outreach and Education:

Engaging the community in educational opportunities through forums, presentations, and workshops.

Youth Training and Employment: Inspiring the next generation of natural resource professionals through hands-on workforce training and employment.

Collaborative Partnerships

Restoring ecosystems requires a collaborative community-based approach. We facilitate partnerships and engagement among a diversity of stakeholders. Our partners include federal and state land management agencies, Native American Tribes, The Nature Conservancy, land trusts, environmental organizations, industry, private landowners, city and county governments, and watershed councils.

Engaging the Community

Our diverse staff of restoration practitioners, ecologists, workforce trainers and educators work to increase community understanding and involvement in forest and watershed restoration.
